

INSPECT TO PROTECT

WITH R. B. HASH

YOUR ROOF CAN LAST LONGER

At R. B. Hash, our goal is to **extend the life expectancy of your roof system** with a value driven, proactive approach. Your roof is an investment, and maintenance is an essential part of its care.

Our **ELITE Roof Maintenance Program** is designed to help prolong the life of your roof!

THE ELITE ROOF MAINTENANCE PROGRAM

- › Inspection of all HVAC unit drain lines, drains, scuppers, curbs, pipe penetrations, and vents
- › Inspection of all flashing metals, gutters and downspouts, coping caps, etc.
- › Removal and disposal of all roof related debris and discarded roofing materials found on roof
- › Review of all field laps, expansion joints, etc. for proper functionality
- › Provide detailed report of current roof condition, including photographs and recommendations
- › Perform proper and permanent repairs of any minor defects found during the inspection

DID YOU KNOW...

More than 80% of commercial roofs are replaced prematurely.

Annual or semi-annual inspections help locate deficiencies before becoming severe.

A proactively maintained roof has the potential to outlast its warranty.

Standard “No Dollar Limit” warranties require regular inspections and maintenance.

Proactive maintenance can result in a roof life of 21 years versus 13 years with a reactive program.
